

Mohammed Nawaz Rifan

Flutter Developer | Software Engineer

+91 81058 71294 | rifan3737mtr@gmail.com | linkedin.com/in/mohammed-nawaz-rifan | github.com/Rifan108

PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate with hands on experience developing cross-platform mobile applications, embedded IoT networks, and decentralized blockchain architectures. Two time National Hackathon Winner and creator of NeuroMesh, an emergency mesh telemetry network recognized in the Top 10 by KSRSAC, Government of Karnataka. Skilled across Flutter, Dart, Firebase, Python, and hardware-software integration with a strong foundation in scalable system design.

EDUCATION

P.A. College of Engineering

Bachelor of Engineering in Computer Science (IoT, Cybersecurity and Blockchain)

Mangalore, India

Graduation: 2027 | CGPA: 7.5 / 10

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android SDK, State Management, Responsive UI/UX, Cross-Platform Architecture

Programming Languages: Python, Java, C, C++, SQL, Solidity, Dart

Backend and Cloud: Firebase (Cloud Firestore, Authentication, Cloud Messaging), RESTful APIs, Node.js

Cybersecurity and Web3: Smart Contracts, Ethereum, Remix IDE, Kali Linux, Wireshark, Metasploit, Nmap, Burp Suite

WORK EXPERIENCE

Pace Wisdom Solutions Pvt. Ltd.

July 2026 – Present

Flutter Developer Intern

Mangalore, India

- Authored a Product Requirements Document (PRD) detailing user journeys, technical scope, and relational data architecture for a food delivery platform.
- Developed and shipped a production-ready mobile application using Flutter, Dart, and Firebase, maintaining single codebase parity across iOS and Android.
- Engineered a dual portal architecture separating customer interfaces from administrative dashboards with Cloud Firestore and Firebase Authentication.
- Implemented real time delivery tracking, state-driven cart calculations, and responsive menu management interfaces.

PROJECTS

NeuroMesh | ESP32, LoRa Mesh, Machine Learning, LangGraph, Python

Top 10 Project, Govt. of Karnataka

- Engineered an internet-independent disaster telemetry mesh network with ESP32 and LoRa nodes to detect structural collapses and gas hazards in real time.
- Built a 4-model machine learning pipeline for seismic classification, hazard detection, and survivor probability estimation.
- Orchestrated a multi-agent LangGraph system generating automated crisis intelligence reports in under 90 seconds, ranking in the Top 10 by KSRSAC.

Decentralized Voting System | Solidity, Ethereum, RFID, Smart Contracts

Best Innovation Award, NITTE

- Architected a tamper-proof electronic voting platform combining RFID hardware voter authentication with Ethereum smart contracts.
- Enforced immutable ballot storage and transparent vote counting, eliminating duplicate voting and centralized vulnerabilities.
- Developed a secure client interface for automated voter verification and ballot casting, winning Best Innovation at Udbhava.

Arogya Mitra | IoT Telemetry, Health Analytics, Automated Alert Engine

Runner-Up, Srinivas University

- Designed an end-to-end continuous health monitoring system capturing vital biometric telemetry from wearable IoT sensors in real time.
- Configured threshold alert triggers to dispatch instant caregiver notifications during critical biometric anomalies.
- Streamed diagnostic analytics to a clinician dashboard for rapid medical intervention, securing Runner-Up honors at Chakravyuha.

Smart Bijli Monitoring System | ESP32, Cloud Analytics, Energy Tracking

Top 30, KTech Summit

- Engineered an ESP32-based energy analytics system tracking granular power usage across connected circuits in real time.
- Developed a cloud dashboard providing automated consumption analytics to identify high-load anomalies and optimize energy usage.
- Recognized among the Top 30 innovators at Karnataka Tech (KTech) Summit for practical impact and energy efficiency.

CERTIFICATIONS AND HONORS

- **Hackathon Honors:** Best Innovation Award (NITTE Udbhava Hackathon), Runner-Up (Srinivas University Chakravyuha Hackathon).
- **Government Recognition:** Top 10 Project Award by KSRSAC (Government of Karnataka K-GIS 2.0 State-Level Innovation Challenge).
- **Certifications:** CS50x (Harvard University), Cybersecurity Specialization (Network Defense and Threat Analysis), One Million Prompters (Dubai Future Foundation), Deloitte Technology Job Simulation.
